

WHY WORK WITH THE JAIC

How We Are Transforming the DoD Through AI

Our vision is to transform the DoD through the integration of AI.

We are building critical infrastructure.

We are developing AI policy and governance standards.

We are creating leverage to deliver AI at scale across the DoD.

How We Are Enabling the DoD Through AI

The JAIC's "transformational value" will have more impact in the enablement space.

We are taking a "problem pull" approach with our DoD stakeholders.

We are building strong relationships across the DoD.

We want to reach "disadvantaged users" and provide them with infrastructure, tools, and expertise to enable their projects.

We are providing "soft services" in Testing & Evaluation, Ethics, and Policy.

Products & Services

- Access to the Joint Common Foundation
- Technical Assistance on AI programs
- Testing and Evaluation Support
